

APPLICATION FOR LISTING AN IMPROVED FOREST MANAGEMENT U.S. FOREST OFFSET PROJECT				
OPR Staff Use Only	Date Application Received:	OPR Tracking Number:	Date Application Reviewed:	OPR Staff Use Only
PART I. ENTITY APPLYING FOR LISTING				
Is this form being submitted by the Offset Project Operator (OPO) or by the Authorized Project Designee (APD)?				☐ OPO ☒ APD
Notes: 1. The person completing this form should be an OPO/APD employee. 2. If the APD is submitting this form, the OPO should submit the form <i>Designation of Authorized Project Designee</i> simultaneously.				
Name of Person Completing Form: Brian Shillinglaw		Organization, if applicable: Forest Carbon Partners, L.P.		
Date Form Completed: 06/30/2014		Phone Number: 415-321-3300	Email Address: bshillinglaw@newforests-us.com	
PART II. OFFSET PROJECT INFORMATION				
Offset Project Name: Trinity Timberlands University Hill Improved Forest Management Project				
Offset Project Commencement Date: 07/01/2013		First Reporting Period Start Date: 07/01/2013	First Reporting Period End Date: 06/30/2014	
Provide an explanation and justification for the commencement date. Specify the action(s) that identify the offset project commencement date. Boots on the ground inventory commenced on the stated date.				
PART III. OPO/APD INFORMATION				
A. OPO				
OPO Name: Trinity Timberlands LLC			OPO's CITSS ID#: CA 1 6 9 6	
Mailing Address: c/o Timmons Advisors, 3555 Timmons Lane, Suite 800		City: Houston	State: TX	Zip: 77027
Contact Person: Glenda Overbeck		Phone Number: 713-961-1600	Email Address: goverbeck@timmonsadvisors.com	
B. APD (if applicable)				
				☐ No APD/Not Applicable
APD Name: Forest Carbon Partners, L.P.			APD's CITSS ID#: CA 1 4 0 3	
Mailing Address: 275 Battery Street, Suite 510		City: San Francisco	State: CA	Zip: 94111
Contact Person: Brian Shillinglaw		Phone Number: 415-321-3300	Email Address: bshillinglaw@newforests-us.com	
PART IV. LAND OWNERSHIP				
A. Is the Offset Project Operator (OPO) the owner in fee for the Project Area? <i>Further documentation is required for all projects. Submit as attachment labeled "Attachment A." See Part X of this listing document for more information.</i> If "no," explain how the entity identified as the OPO has the right to undertake and list the project.				☒ Yes ☐ No
B. List all Forest Owners. This includes owners in fee as well as third parties with existing property interests within the Project Area that affect the trees and standing timber located in the Project Area (e.g. mineral rights, timber rights, easements, rights of way, leases, etc.). Trinity Timberlands LLC				

C. Does the offset project occur on public or private lands? <i>If the project occurs on public lands, proceed to questions C1 and C2. Otherwise, skip to question D. Further documentation is required if project occurs on public lands. Submit as attachment labeled "Attachment B." See Part X of this listing document for more information.</i>		☒ Private ☐ Public
1. Describe the public process that has been used to approve forest management activities and baseline.		
2. Describe the documentation being submitted with this listing document demonstrating approval of planned forest management activities and baseline.		
D. Will the project employ a Qualified Conservation Easement (QCE)? <i>If employing a QCE, proceed to questions D1, D2, and D3. Otherwise, skip to question E. Supporting documentation for a QCE is required. Submit as attachment labeled "Attachment C." See Part X of this listing document for more information.</i>		☐ QCE ☐ Public Ownership
1. Date that the QCE was or will be recorded.		
2. Will the project take place in a state that requires third-party beneficiaries to sign the easement (i.e., to "accept and record that acceptance"), such as Arizona, Pennsylvania, or West Virginia?		☐ Yes ☐ No
3. Provide the terms within the easement that affect forest management.		
E. Does the offset project occur on any of the following categories of land? (check all that apply) ☐ Land that is owned by, or subject to, an ownership of possessory interest of a Tribe ☐ Land that is "Indian lands" of a Tribe as defined by 25 U.S.C. §81(a)(1) ☐ Land that is owned by any person, entity, or Tribe, within the external borders of such Indian lands ☒ None of the above <i>If "none of the above," skip to Part V. Otherwise, proceed to questions E1 and E2. Further documentation is required for projects occurring on land listed in the first three categories. Submit supporting documents as attachments labeled "Attachment D." See Part X of this listing document for more information.</i>		
1. Does a limited waiver of sovereign immunity between ARB and the governing body of the Tribe exist?		☐ Yes ☐ No
2. Describe how the land within the Project Area is owned.		
PART V. OFFSET PROJECT AREA		
<i>Maps depicting specific elements of the Project Area are required for all projects. Submit supporting documentation as attachments labeled "Attachment E." See Part X of this listing document for more information.</i>		
Latitude of Offset Project Location: 40.58	Longitude of Offset Project Location: -123.50	Project Area Total Acreage: 11,902
A. Identify the assessment area (or assessment areas, if project crosses more than one) that contain Project Area lands and list the acreage of project lands within each assessment area. The project area lies wholly within the Southern Cascades mixed conifer assessment area, see Map 1 in Attachment E		
B. Identify the governing jurisdiction(s) applicable to the Project Area. The project area is governed by the counties of Humboldt and Trinity as well as the state of California.		
C. Describe how the Project Area was determined. The Project area is the entire operable Trinity Timberlands ownership.		
D. Describe the existing land cover, and land use of the Project Area. See Attachment E, item V.D.		
E. Describe the forest vegetation types within the Project Area boundary. See Attachment E, item V. E.		
F. Describe the site classes within the Project Area boundary. See Attachment E, item V. F.		
G. Describe the land pressures and climate zone/classification applicable to the Project Area. See Attachment E, item V.G.		
H. Describe the historical land uses, current zoning, and projected land use within the Project Area and surrounding areas. See Attachment E, item V.H.		
I. Describe generally the forest conditions within the Project Area, including species composition, age class distribution, and management history. See Attachment E, item V. E.		

PART VI. OFFSET PROJECT ELIGIBILITY

A. Does the project take place on land that has greater than 10 percent tree canopy cover? <i>Supporting documentation is required. Submit as attachment labeled "Attachment F." See Part X of this listing document for more information.</i>		☒ Yes ☐ No
B. Indicate how the offset project meets (or will meet) the definition of Natural Forest Management per Table 3.2 in the Compliance Offset Protocol US Forest Offset Projects, October 20, 2011:		
1. Native species: a) Will the project consist of at least 95% native species based on the estimated sum of carbon in the standing live carbon pool? <i>If "no," proceed to question 1b. Otherwise, skip to question B2.</i>		☒ Yes ☐ No
b) Describe how the project will meet this requirement. (Improved Forest Management Projects will be assessed using estimates of basal area per acre.)		
2. Composition of native species: a) Does the Project Area naturally consist of a mixed species distribution where no single species' prevalence, measured as the percent of basal area of all live trees in the Project Area, exceeds the percentage value of standing live carbon shown under the heading 'Species Diversity Index' in the Assessment Area Data File? <i>If "no," proceed to questions 2b and 2c. Otherwise skip to question B3.</i>		☒ Yes ☐ No
b) Explain how the project will demonstrate a trend toward achieving the Species Diversity Index of native species and meet this requirement within 25 years.		
c) If the Project Area does not naturally consist of a mixed species distribution: Will or have you provided a written statement from the government agency in charge of forestry regulation in the state where the project is located stipulating that the Project site is not capable of meeting the requirement of mixed species distribution.		☐ Yes ☐ No
3. Distribution of age classes/sustainable management: a) Indicate how the project will meet the requirement for sustainable management if commercial harvesting is either planned or ongoing within the Project Area demonstrating sustainable long term harvesting practices. This applies to all forest landholdings of the Forest Owner(s) (check one of the boxes). ☒ Not applicable; no commercial harvesting is occurring within the Project Area. ☐ Third party certification under the Forest Stewardship Council, Sustainable Forestry Initiative, or Tree Farm System, whose certification standards require adherence to and verification of harvest levels which can be permanently sustained over time. ☐ Adherence to a renewable long-term management plan that demonstrates harvest levels which can be permanently sustained over time and that is sanctioned and monitored by a state or federal agency. ☐ Employ uneven-aged silvicultural practices and maintain canopy retention averaging at least 40% across the forest, as measured on any 20 acres within the entire forestland owned by the Forest Owner, including land within and outside of the Project Area (areas impacted by Significant Disturbance may be excluded from this test).		
b) On a watershed scale up to 10,000 acres (or the Project Area, whichever is smaller), projects must maintain, or make progress toward maintaining, a maximum of 40% of the project's forest lands in ages that are less than 20 years old. (Areas impacted by Significant Disturbance are exempt from this test until 20 years after reforestation of such areas.) Does the acreage within this project does meet this requirement? <i>If "no," proceed to question 3c. Otherwise, skip to question B4.</i>		☒ Yes ☐ No
c) Explain how the project intends to show continuous progress toward meeting this requirement within the next 25 years.		
4. Structural elements (standing and lying dead wood): How will the project ensure that structural elements are retained in sufficient quantities throughout the project life? See Attachment E, item VI.B4.		
C. Describe the management activities that will lead to increased carbon stocks in the Project Area, compared to the baseline. See Attachment E, Item VI. C.		
D. Is this project being implemented and conducted as the result of any law, statute, regulation, court order, or other legally binding mandate? If "yes," explain:		☐ Yes ☒ No

E. Will the offset project employ broadcast fertilization?	☐ Yes ☒ No
F. Does the offset project take place on land that was part of a previously listed and verified Forest Offset Project? <i>If "yes," proceed to questions E1 and E2. Otherwise, skip to Part VII.</i>	☐ Yes ☒ No
1. Was the previous Forest Offset Project terminated due to an Unintentional Reversal?	☐ Yes ☐ No
2. Is the project transitioning to the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011, after previously being listed as an early action offset project?	☐ Yes ☐ No
PART VII. CARBON STOCK INVENTORY	
A. Provide a general description of the inventory methodology to be used to quantify carbon stocks for each required carbon pool in the forest project's offset boundary. The inventory methodology must describe the information required in Appendix A.3 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011. IFM-1 Standing Live: See Attachment E, Item VII. A IFM-3 Standing Dead: See Attachment E, Item VII. A IFM-6 Soil (if applicable): See Attachment E, Item VII. A IFM-7 Carbon in in-use forest products: See Attachment E, Item VII. A IFM-8 Forest product carbon in landfills (if applicable): See Attachment E, Item VII. A IFM- 9 Biological emissions from site preparation: See Attachment E, Item VII. A IFM-14 Biological emissions/removals from change in harvesting on forestland outside project area: See Attachment E, Item VII. A IFM-17 Biological emissions from decomposition of forest products: See Attachment E, Item VII. A	
B. Describe the calculation methodologies to be used to determine metric tons per acre for each of the carbon pools included in the Offset Project Data Report. IFM-1 Standing Live: See Attachment E, Item VII. B IFM-3 Standing Dead: See Attachment E, Item VII. B IFM-6 Soil (if applicable): See Attachment E, Item VII. B IFM-7 Carbon in in-use forest products: See Attachment E, Item VII. B IFM-8 Forest product carbon in landfills (if applicable): See Attachment E, Item VII. B IFM- 9 Biological emissions from site preparation: See Attachment E, Item VII. B IFM-14 Biological emissions/removals from change in harvesting on forestland outside project area: See Attachment E, Item VII. B IFM-17 Biological emissions from decomposition of forest products: See Attachment, Item VII. B	
C. Provide a summary of the inventory of carbon stocks for each carbon pool (or approach used, if inventory is not applicable). IFM-1 Standing Live: 2,439,910 tonnes CO ₂ e including below ground live IFM-3 Standing Dead: 71,412 tonnes CO ₂ e IFM-6 Soil (if applicable): N/A IFM-7 Carbon in in-use forest products: 0 currently IFM-8 Forest product carbon in landfills (if applicable): 0 currently IFM- 9 Biological emissions from site preparation: Accounted for based on measured carbon stock changes in included reservoirs IFM-14 Biological emissions/removals from change in harvesting on forestland outside project area: Estimated at 6% of baseline stocks - 86,490 tonnes CO ₂ e IFM-17 Biological emissions from decomposition of forest products: Accounted for based on measured carbon stock changes in included reservoirs	
D. Provide a summary of the estimated inventory confidence statistics. See Attachment E, Item VII. D	
E. Provide the calculation of the offset project's reversal risk rating and expected contribution to the Forest Buffer Account. See Attachment E, Item VII. E.	

PART VIII. OFFSET PROJECT BASELINE

A. Required for ALL Improved Forest Management Projects

1. Describe the project's modeling plan, following the requirements and methods in Appendix B, Section B.3 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011.
See Attachment E, Item VIII A.1
2. Describe and estimate the project's baseline onsite carbon stocks. Explain any annual changes in baseline carbon stocks over time.
See Attachment E, Item VIII A.2 and Attachments G and H
A graph portraying the baseline onsite carbon stocks, labeled "Attachment G," and a diagram of the baseline incorporating all required carbon stocks, labeled "Attachment H," are required. See Part X of this listing document for more information.
3. Identify the approved growth model that will be used for the project.
FVS, ICASCA variant
4. Harvest Planning
 - a. Is harvesting planned in the Project Area?
If "yes," proceed to question 4b. Otherwise, skip to question A5.

☐ Yes
☒ No
 - b. Will the project use a harvest schedule model?
If "yes," proceed to question 4c. Otherwise, skip to question A5.

☐ Yes
☐ No
 - c. How do you plan to address age class and stratification as part of your harvest scheduling?
5. Provide an estimate of carbon that will be stored long-term in harvested wood products in the baseline.
See Attachment E, Item VIII. A.2.

B. Required for Improved Forest Management Projects on Private Lands ONLY

1. Provide the estimated initial above ground standing live carbon stock per acre for the project, if known.
164 metric tonnes/acre of CO₂e
2. Provide the estimated adjusted above ground standing live carb stock per acre, if known.
164 metric tonnes/acre of CO₂e
3. Provide the Common Practice statistic associated with the Project Area.
88 metric tonnes/acre of CO₂e
4. Are the Project Area's initial above-ground standing live carbon stocks per acre above or below Common Practice?
If below Common Practice, what is the High Stocking Reference for the Project Area?
N/A
Further documentation is required if project below Common Practice. Submit supporting documents as attachments labeled "Attachment I." See Part X of this listing document for more information.

☒ Above
☐ Below
5. Does the Forest Owner(s) and its affiliate(s) own land in fee or hold timber rights on land outside the Project Area, such that use of a weighted average carbon stock on lands in the same Logical Management Unit (as defined in Section 6.2.1.1) will be conducted?
If "yes," is inventory data available for the LMU or will the OPO use a stratified vegetation analysis?

☐ Yes
☒ No
6. Provide a general description of the legal constraints affecting forest management activities in the Project Area; include a description of each constraint (referring to Section 6.2.1.2 in the Protocol) as well as a narrative those constraints have on forest management.
See Attachment E, Item VIII B.6
7. Provide a description of the modeling techniques used to simulate the effects of the constraint.
See Attachment E, Item VIII B.7
8. How will the OPO demonstrate financial feasibility of the growth and harvesting regime assumed for the baseline? (check one of the boxes)
☐ Conducting a financial analysis of the anticipated growth and harvesting regime that captures all relevant costs and returns, taking into consideration all legal, physical, and biological constraints, using regional norms or documented costs and returns for the project area or other properties in the Forest Project's Assessment Area
☒ Providing evidence that activities similar to the proposed baseline growth and harvesting regime have taken place on other properties within the Forest Project's Assessment Area within the past 15 years

C. Required for Improved Forest Management Projects on Public Lands ONLY

1. Has an initial forest carbon inventory been conducted for the Project Area?

☐ Yes
☐ No
2. Provide a projection of future changes to Project Area forest carbon stocks extrapolating from historical trends.

3. Explain how current public policy will affect onsite carbon stocks and how the baseline modeling incorporates constraints imposed by all applicable statutes, regulations, policies, plans, and activity-based funding.			
4. Have carbon stocks in the Project Area been increasing or declining over the preceding ten-year period?			☐ Increasing ☐ Declining
PART IX. ADDITIONAL QUESTIONS			
A. Have any lands within the Project Area ever been listed or registered with an offset project registry or program in the past? <i>If "yes," identify the registry or program and provide details on the issued credits below.</i>			☐ Yes ☒ No
B. Have greenhouse gas emission reductions or removal enhancements associated with lands within the Project Area been credited or claimed for the purpose of greenhouse gas mitigation or reduction goals, whether in a voluntary or regulatory context? <i>If "yes," identify the registry or program and provide details on the issued credits below.</i>			☐ Yes ☒ No
Registry/Program:	Reporting Period(s):	Vintage(s):	Number of Credits Issued:
PART X. ATTACHMENTS			
A. If the answer to Part IV.A is "yes," provide documentation (e.g., deed of trust, title report, etc.) showing the OPO's ownership interest in the property and its interest in the trees and standing timber on the property. If the answer to Part IV.A is "no," provide documentation supporting the explanation of the OPO's right to undertake and list the project.			
B. If the answer to Part IV.C is "public," provide documentation demonstrating explicit approval of the offset project's management activities and baseline including any public vetting processes necessary to evaluate management and policy decisions concerning the offset project. ☒ N/A			
C. If a Qualified Conservation Easement (QCE) has been recorded, provide a copy. The listing information contained in this form and the documents attached to it will eventually be submitted to ARB so submitting a copy of the QCE as an attachment to this listing document fulfills the requirement in 9.1.1.1(18)(a) of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 to provide ARB with a copy. ☒ N/A			
D. If the project is located on one of the categories of Tribal land listed in Part IV.E, provide documentation demonstrating that the land within the Project Area is owned by a tribe or private entity. Also provide documentation that demonstrates the existence of a limited waiver of sovereign immunity between ARB and the governing body of the Tribe entered into pursuant to section 95975(I) of the Cap-and-Trade Regulation. ☒ N/A			
E. Attach map(s) of the Project Area including: 1. Public and private roads 2. Towns 3. Major watercourses (4th order or greater), water bodies, and watersheds 4. Topography 5. Townships, ranges, and sections or latitude and longitude 6. Existing land cover and land use (optional) 7. Forest vegetation types (optional) 8. Site classes (optional) 9. Land pressures and climate zone/classification (optional) 10. Historical land uses, current zoning, and projected land use within the Project Area (optional) 11. A georeferenced shape file (or other electronic file that can be read in a geographic information system) that clearly identifies the Project Area and boundaries. <i>Note that the georeferenced shape file may constitute the required map if it includes the required map information listed above.</i>			
F. Provide supporting documentation demonstrating that the offset project takes places on land that has greater than 10 percent tree canopy cover.			
G. Attach a graph portraying the baseline onsite carbon stocks with time depicted on the x-axis and metric tons CO₂e depicted on the y-axis.			
H. Attach a diagram of the baseline incorporating all required carbon stocks.			
I. For projects on <u>private lands ONLY</u>: If the Project Area's initial above-ground standing live carbon stocks are below Common Practice, submit an affidavit testifying that the inventory depicted over the past 10 years (used to determine the High Stocking Reference for the Project Area) is reasonably accurate and a summary of volume harvested over the past 10 years. ☒ N/A			
PART XI. ATTESTATIONS AND OPO/APD SIGNATURE			

 Initial	I certify under penalty of perjury under the laws of the State of California the GHG reductions and/or GHG removal enhancements for			
	Project Name: Trinity Timberlands University Hill Improved Forest Management Project		Crediting Period Start Date: 7/1/2013	Crediting Period End Date: 6/30/2038
	from		to	
will be measured in accordance with the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011, and all information required to be submitted to ARB is true, accurate, and complete.				
 Initial	I understand I am voluntarily participating in the California Greenhouse Gas Cap-and-Trade Program under title 17, article 5, and by doing so, I am now subject to all regulatory requirements and enforcement mechanisms of this program and subject myself to the jurisdiction of California as the exclusive venue to resolve any and all disputes arising from the enforcement of provisions in this article.			
 Initial	I understand that the offset project activity and implementation of the offset project must be in accordance with all applicable local, regional, and national environmental and health and safety laws that apply to the offset project location. I understand that offset projects are not eligible to receive ARB or registry offset credits for GHG reductions and GHG removal enhancements that are not in compliance with the requirements of the cap-and-trade program.			
In signing this form, I certify under penalty of perjury of the laws of California that the information contained in this form is true, accurate, and complete. I further certify that I am an Account Representative of the Offset Project Operator (OPO).				
SIGNATURE: 		PRINTED NAME: Glenda Overbeck		
TITLE: 		DATE: July 2, 2014		

Background for Application of Listing an Improved Forest Management U.S. Forest Offset Project

Section 95975 of the Cap-and-Trade Regulation describes the requirements and process for an Offset Project Operator (OPO) or Authorized Project Designee (APD) to list an offset project with an approved Offset Project Registry. This form is designed to help an OPO or APD fulfill the requirements of Section 95975 of the Cap-and-Trade Regulation and of Section 9.1.1 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011, for listing an offset project. The Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 designates three project types: Avoided Conversion, Improved Forest Management, and Reforestation. This form is designed for Improved Forest Management projects only. The information in the completed form should be submitted to the approved Offset Project Registry with which the OPO or APD would like their offset project listed.

Where to Submit Information Contained in This Form

Please complete the information on the form using your computer. Then print, sign, and scan the form. The completed and signed information and all supporting documentation should be submitted to the appropriate Offset Project Registry.

Copies of this form can be downloaded from the ARB website at:
<http://www.arb.ca.gov/cc/capandtrade/offsets/forms/forms.htm>

Detailed Instructions for Application for Listing an Improved Forest Management U.S. Forest Offset Project

Part I. Entity Applying for Listing:

- Indicate whether the Offset Project Operator (OPO) or Authorized Project Designee (APD) is submitting the information for project listing. Section 95975(a) of the Cap-and-Trade Regulation requires that the OPO and, if applicable, the APD must register with ARB for the Cap-and-Trade Program prior to listing a project. It also requires that neither the OPO nor APD be subject to any Holding Account restrictions imposed as part of an enforcement action. To register with ARB, please visit the website for Compliance Instrument Tracking System Services (CITSS): <https://www.wci-citss.org/>
- List the name, organization, phone number, and email address of the person submitting the information. This person should be an employee of the OPO or APD, whichever entity is making the submission. The person submitting the information need not be the same person as the contact person listed for the OPO or APD in Part III and also need not be the person signing the form in Part XI.
- The person submitting the information should indicate the date the form is completed.

Part II. Offset Project Information:

- Provide the name for the offset project. Indicate the offset project commencement date and the start and end dates of the first reporting period; approximations are acceptable if precise dates are unknown.
- Project commencement for an Improved Forest Management Project must be linked to a discrete, verifiable action that delineates a change in practice that increases sequestration and/or decreases emissions relative to the forest project's baseline. This date could be when the Project Area is transferred to public ownership, when a conservation easement on the Project Area is recorded, or when submitting the offset project listing information.

Part III. OPO/APD Information:

- Enter contact information for the OPO and APD requesting the offset project listing. Every offset project will have an OPO. If an offset project does not have an APD, please mark the box indicating the Offset Project does not have an APD and leave the remaining fields blank.
- For both the OPO and, if applicable, the APD, enter the entity's name, its mailing address, and the name, phone number, and email address of a contact person for the entity. Also include its CITSS ID number. The CITSS ID is six characters in length, with two letters followed by four numbers (e.g., "CA1234"). **DO NOT PROVIDE THE CONFIDENTIAL CITSS ACCOUNT NUMBER**, which begins with the CITSS ID number followed by a hyphen and more numbers.

Part IV. Land Ownership:

- This part includes questions regarding land ownership and property interests.
- Further documentation is required based on the responses to some questions. See Part X of this listing form for more information on the precise requirements.

Part V. Offset Project Area:

- This part asks for qualitative descriptions of the offset Project Area.
- Maps are required to complement the descriptions provided in this part. See Part X of this listing form for more information on the precise requirements.
- The Project Area should be determined following the requirements of Section 4 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011.
- Assessment areas shall be determined by referencing the Assessment Area Data File available at: <http://www.arb.ca.gov/cc/capandtrade/protocols/usforestprojects.htm>

Part VI. Offset Project Eligibility:

- The questions in this part are designed to facilitate the determination of project eligibility for Improved Forest Management Projects.
- Further documentation is required based on the responses to some questions. See Part X of this listing form for more information on the precise requirements.
- Details on the eligibility requirements for Improved Forest Management Projects can be found in Sections 2.1.2, 3.1, and 3.8 of the Compliance Offset Protocol U.S. Forest Project, October 20, 2011.
- Details on the Natural Forest Management criteria can be found in Table 3.2 in the Compliance Offset Protocol U.S. Forest Project, October 20, 2011.

Part VII. Carbon Stock Inventory:

- Projects are not required to have completed a full carbon stock inventory at the time of listing, but OPOs/APDs should be familiar with Appendix A and have a plan for how they will meet the requirements therein. Therefore, a general description of the project's inventory methods and procedures, consistent with the requirements in Appendix A.3, is required at the time of listing. ARB recognizes that some information provided will be preliminary and based on best estimates. If the project's inventory methodology changes between the time of listing and submission of the first OPDR, this should be reported as a change to the information submitted at project listing when submitting the first OPDR.
- Section 6.2 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 outlines the approved quantification methodologies for Improved Forest Management Projects. Further details on completing a forest project carbon inventory can be found in Appendix A of the Protocol.
- Follow the steps in Appendix D of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 to quantify the project's reversal risk rating.
- The project's expected contribution to the Forest Buffer Account is determined annually based upon the project's risk of reversal and is calculated by multiplying the project specific reversal risk rating by the total net GHG reductions/removals achieved by the project. An approximation of the contribution to the Forest Buffer Account is acceptable.

Part VIII. Offset Project Baseline:

- Projects are not required to have a finalized baseline at the time of listing, but OPOs/APDs should be familiar with Appendix B and have a plan for how they will meet the requirements therein. A complete modeling plan reflecting the requirements in Appendix B.3 is therefore required at the time of listing. ARB recognizes that some information provided will be preliminary or based on best estimates. If the project's modeling plan or baseline estimates change between the time of listing and submission of the first OPDR, this should be reported as a change to the information submitted at project listing when submitting the first OPDR.
- Note that IFM projects located on public land must present documentation demonstrating explicit approval of the offset project's management activities and baseline. These projects may report changes to the baseline within the initial OPDR if the changes have gone through a public review process and meet the Protocol requirements regarding explicit approval of the project's baseline.
- This part is divided into three sections: questions required for all Improved Forest Management Projects; questions for Improved Forest Management Projects on private lands; and questions for Improved Forest Management Projects on public lands. Answer the questions applicable to the project.
- Section 6.2 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 outlines the approved quantification methodologies for Improved Forest Management Projects. Instructions for

considering legal and financial constraints can be found in Sections 6.2.1.2 and 6.2.1.3, respectively. Further details on modeling carbon stocks can be found in Appendix B of the Protocol.

- ARB approved growth models can be found in Appendix B, Section B.1 of the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011.
- When a requirement is not applicable to the project being listed, please select the "N/A" (Not Applicable) checkbox next to the requirement so that it is clear that the question was not inadvertently left unanswered.

Part IX. Additional Questions:

- Answer both questions. If the answer to either question is "yes," identify the registry or program and provide details on the issued credits in the space provided.

Part X. Attachments:

- Provide each attachment on a separate sheet of paper and submit along with the completed application for listing.
- To aid with tracking each attachment, it is recommended that the attachments are labeled to correspond with the letter in Part X that they refer to (e.g. "Attachment B").
- When an attachment is not applicable to the project being listed, please select the "N/A" (Not Applicable) checkbox next to the requirement so that it is clear that the attachment was not inadvertently left off.

Part XI. Attestations and OPO/APD Signature:

- Section 95975(c) of the Cap-and-Trade Regulation requires three attestations for listing an offset project. The required attestations are provided in this section. Each attestation should be initialed by the person signing the form.
- The first attestation requires the applicant to provide the offset project name and the start and end dates of the crediting period to complete the statement. The offset project name should match the name entered in Part II. The dates for the offset project's crediting period must also be provided. Please note that the dates provided in the attestation are for the crediting period, not for the first reporting period provided in Part II. The crediting period dates may be approximate if precise dates are not known.
- The attestations must be submitted to ARB but need not be submitted to ARB until requesting issuance of ARB offset credits. A request for issuance of ARB offset credits requires a copy of the offset project listing information, and providing the attestations on this form will satisfy this regulatory requirement.
- The individual signing the document must be registered in CITSS as the Primary Account Representative or Alternate Account Representative for the OPO.
- Please provide the person's signature, printed name, corporate title, and date signed.

Please contact your Offset Project Registry with any questions.
