

Decision
on the approval
of a carbon-credit Category
Decision number:
VCS_ACM0001v15-19_2024

1. The Governing Board considered the Draft Evaluation Report and the Recommendation from the Standards Oversight Committee and decides¹:
 - a) The Category/Categories meet(s) the relevant criteria and requirements for CCP-approval.
- ACM0001 Flaring or use of landfill gas v15-19 applied under VCS², where the following conditions are met:
 - All Landfill Gas (LFG) project types that do not generate electricity; and
 - LFG-to-electricity projects with a capacity of equal to or below 10 MWe.

Date of Board Decision	30 May 2024
-------------------------------	-------------

¹ This is in no way an assessment of or Decision in relation to any identical or substantially similar methodology used in a compliance system in respect of which this methodology is used.

² The Clean Development Mechanism is under the Kyoto Protocol, but its published methodologies and Tools are public goods and are commonly used by other carbon-crediting programs (e.g. Gold Standard, Social Carbon and Verra). Once in use by another carbon-crediting program (including in an unchanged format), a CDM methodology or Tool is considered to form part of that carbon crediting program's program documents, through incorporation by reference. Assessment under the ICVCM for adherence to the CCPs and Assessment Framework in no way constitutes an assessment of the CDM itself by the ICVCM.
