

VCS Validation Statement

Bureau Veritas Certification has made the validation of Inner Mongolia Sunjiaying 50.25MW Wind Power Project of Chifeng Xinsheng Wind Power Co. Ltd. The Project was registered as a CDM project on 24/04/2008 with the UNFCCC reference number as 1488.

(<http://cdm.unfccc.int/Projects/DB/DNV-CUK1198676316.92/view>)

The Project started export electricity to the grid on 27/12/2006. Due to the delays it was not registered under the CDM until 23/04/2008.

According to VCS 2007.1 dated on 18/11/2008 and a Policy Announcement of Further Guidance for Projects that are registered in Two GHG Programs issued by the VCS Association on 19/03/2008, the Project registered under CDM program is eligible to claim Voluntary Carbon Units (VCUs) generated prior to the CDM program from 17/07/2008 to 22/02/2009. In compliance with the Policy Announcement from the VCS Association, this validation statement is to cover a validation of clauses 1.12, 1.13, 1.14, 8.1 and 8.2 set out in the VCS Project Description template for project validation and as an addendum to the CDM validation report of the project for completion of VCS validation.

An analysis as provided by the applied VCS program approved methodology demonstrates that the project activity is not likely a baseline scenario. Emission reductions attributable to the project are hence additional to any that would occur in the absence of the project activity. Given that the project is implemented as designed, the project is likely to achieve the estimated amount of emission reductions as specified within the VCS PD version 01 dated 14/01/2010.

VCS PD version 01 and the relevant information is available to us to determine the fulfillment of stated criteria. In BVC's opinion, the Project correctly applies and meets the relevant VCS requirements and the relevant host country's criteria.

VALIDATION PROTOCOL OF CLAUSES 1.12, 1.13, 1.14, 8.1 AND 8.2 OF THE VCS 2007 PD

Clauses of VCS 2007 PD	Ref.	MoV	COMMENTS	Concl
1. Description of Project				
1.1. Project Title				
1.12. Demonstration to confirm that the project was not implemented to create GHG emissions primarily for the purpose of its subsequent removal or destruction.	VCS-PD CDM Validation report CDM LoAs	DR	The Project activity is to generate electricity utilize wind source, displacing part of electricity supplied by fossil fuel-fired power plants of the North China Power Grid. Thus the implementation of the project is not for the purpose of its subsequent removal or destruction.	OK
1.13. Demonstration that the project has not created another form of environmental credit (for example renewable energy certificates)	VCS-PD CDM Validation report CDM LoAs	DR	No. The project activity is located in China and is developed and operated by Chifeng Xinsheng Wind Power Co. Ltd. which is a Chinese Enterprise. As described in PD, the project is applied for VCU credits that produced before the CDM registration.	OK
1.14. Project rejected under other GHG programs (if applicable)	UNFCCC website	DR	The project activity has only been registered under CDM program without rejection.	OK

Clauses of VCS 2007 PD	Ref.	MoV	COMMENTS	Concl
8. Ownership				
8.1. Proof of Title	CDM Validation Report Proof of Title VCS PD	DR	Evidences of proof of title have been verified via documentation proving ownership of the plant and equipment at the site. The project's design and implementation have been verified in compliance with all relevant and national legislations in China.	OK
8.2. Projects that reduce GHG emissions from activities that participate in an emissions trading program (if applicable)	UNFCCC Website VCS PD	DR	The project is registered as a CDM project on 24/04/2008. The project did not create any other form of environmental credit during this monitoring period, and that the emission reductions generated by the project in this monitoring period will to be sold only once under VCS Program, the reductions or removals generated by the Project will not be used in another emission trading program or jurisdiction.	OK
