

VCS Validation Statement

Bureau Veritas Certification has made the validation of Henan Zhengzhou Grid Connected Natural Gas Combined Cycle Power Plant of Zhengzhou Combined Cycle Power Co., Ltd. The project activity was registered as a CDM project on 26 March 2008 with the UNFCCC reference number as 1344.

<http://cdm.unfccc.int/Projects/DB/DNV-CUK1189684459.76/view>

The project began generating electricity in January 2007. Due to some delays it was not registered under the CDM until 26 March 2008.

According to VCS 2007 dated on 19 November 2007 and a Policy Announcement of Further Guidance for Projects that are registered in two GHG programs issued by the VCS Association on 19 March 2008, Bureau Veritas Certification considered that the proposed project is compliance with the applicable VCS Rules / relevant VCS criteria and the proposed project registered under CDM program is eligible to claim Voluntary Carbon Units (VCUs) generated from 9 January 2007 to 25 March 2008 prior to the CDM program. In compliance with the Policy Announcement from the VCS Association, this validation statement is to cover a validation of clauses 1.12, 1.13, 1.14, 8.1 and 8.2 set out in the VCS Project Description template for project validation and as an addendum to the CDM validation report of the project for completion of VCS validation.

An analysis as provided by the applied VCS program approved methodology demonstrates that the project activity is not a likely baseline scenario. Emission reductions attributable to the project are hence additional to any that would occur in the absence of the project activity. Given that the project is implemented as designed, the project is likely to achieve the estimated amount of emission reductions as specified within the final PD version 01 dated 25 November 2008.

The review of the PD version 01 and the information made available to us todetermine the fulfillment of stated criteria. In our opinion, the project correctly applies and meets the relevant VCS requirements and the relevant host country criteria.

VALIDATION PROTOCOL OF CLAUSES 1.12, 1.13, 1.14, 8.1 AND 8.2 OF THE VCS 2007 PD

Clauses of VCS 2007 PD	Ref.	MoV	COMMENTS	Concl
1. Description of Project				
1.1. Project Title				
1.12. Demonstration to confirm that the project was not implemented to create GHG emissions primarily for the purpose of its subsequent removal or destruction.	1. CDM-PDD 2.CDM Validation report 3. CDM LoAs	DR	The proposed project activity is a natural gas generation project and will generate GHG emission reductions by avoiding CO ₂ emissions from electricity generation of coal-fired dominated business-as-usual scenario in Central China Power Grid. Operation of this project does not lead to GHG emissions.	OK
1.13. Demonstration that the project has not created another form of environmental credit (for example renewable energy certificates)	1.CDM PDD 2.CDM Validation report 3.CDM LoAs		No. The project activity is located in China and is developed and operated by Zhengzhou Combined Cycle Power Co., Ltd. which is a Chinese Enterprise. As described in the PD, the project is applied for VCU credits that produced before the CDM registration. The period of the two has been verified and found not overlapped with each other.	OK
1.14. Project rejected under other GHG programs (if applicable)	UNFCCC website	DR	The project activity has only been registered under CDM program without rejection. (UNFCCC registration. no.1344 dated 26/03/2008)	OK

Clauses of VCS 2007 PD	Ref.	MoV	COMMENTS	Concl
8. Ownership				
8.1. Proof of Title	2. CDM Validation report 4. Proof of Title 5. VCS PD	DR	Evidences of proof of title have been verified via documentation proving ownership of the plant and equipment at the site, such as Business License and Nameplate of the equipment. The project's design and implementation have been verified in compliance with all relevant and national legislations in China.	OK
8.2. Projects that reduce GHG emissions from activities that participate in an emissions trading program (if applicable)	UNFCCC Website 5. VCS PD	DR	The project activity has been registered as a CDM project on 26/03/2008 with the reference number 1344, for which a renewable crediting period of 3×7 years will be used under the CDM Program and the first crediting period is from 26/03/2008 to 25/03/2015. Therefore, GHG emission reductions generated by the project activity covering the CDM crediting period will be verified as unique CERs. Only GHG emission reductions achieved from the commissioning date of the project activity up to 25/03/2008 could be verified as VCUs under the VCS 2007 program.	OK
