5	Summary of the Project Activity	60

Abbreviations

CEA	Central Electricity Authority
CPP	Captive Power Plant
GUVNL	Gujarat Urja Vikas Nigam Ltd
JVVNL	Jaipur Vidyut Vitaran Nigam Ltd
KPTCL	Karnataka Power Transmission Company Ltd.
MSEDCL	Maharashtra State Electricity Distribution Company Ltd
NEWNE Grid	Northern, Eastern, Western and North Eastern Grid
PP	Project Promoter
PPA	Power Purchase Agreement
STG	Sale to Grid
SEB	State Electricity Board
TNEB	Tamilnadu Electricity Board
UNFCCC	United Nation Framework Convention on Climate Change
WEG	Wind Electric Generator
WTG	Wind Turbine Generator

1. Introduction

The purpose of this document is to report the Emission Reductions (ERs) generated by the Grouped Wind Power Project in India during the period 01/01/2008 – 31/07/2009.

This monitoring report has been prepared in accordance with the monitoring plan contained in the registered VCS Project Description (PD) and will serve as the basis for verification, certification and issuance of the emission reductions during the monitoring period indicated above.

The vintage for first monitoring period is 01/01/2008 – 31/07/2009.

2. Description of Project Activity

2.1 Title of the project activity:

Grouped Wind Power Project in India

2.2 Description of the Project Activity

The project is a grouped project activity, which generates renewable electricity from wind (a clean source of energy). The generated renewable electricity will displace equivalent amount of carbon intensive electricity from the Northern, Eastern, Western and North Eastern Grid (NEWNE) and Southern Grid in India. The grouped projects consist of 68.875 MW grid-connected and 6.025 MW captive renewable electricity generations with aggregate capacity of 74.9 MW.

The project is a grouped project of 72 project promoters with capacity of WTGs ranging from 0.225 to 1.5 MW. The complete wind farm list is provided in as below –

Sr. No.	Name of Project Promoter	Installed Capacity (MW)	Commissioning Date	Village	District	Electricity Usage

3. Methodology and Monitoring Plan

According to UNFCCC definitions and Voluntary Carbon Standard (VCS 2007.1), the project falls under Large-scale projects activity, the project is defined as below:

Title: "Consolidated baseline methodology for grid-connected electricity generation from renewable sources"

Sectoral Scope: 1, Energy industries (renewable - / non-renewable sources)

Type: Renewable Energy Project (Large Scale)

Category: ACM 0002 – Version 10, EB 47

Monitoring Parameter:

Data / Parameter:	EGy
Data unit:	kWh
Description:	Net electricity generated and delivered to the grid by WEG in year 'y'
Source of data to be used:	Data is obtained from the State Electricity Board (SEB)'s official source to use from - • Maharashtra State – MSEDCL • Gujarat – GUVNL • Rajasthan – JVVNL • Tamilnadu - TNEB • Karnataka - KPTCL
Value of data applied for the purpose of calculating expected emission reductions	Net exported units as mentioned on monthly credit/generation report of state utility.
Description of measurement methods and procedures to be applied:	<u>Monitoring:</u> Tri-vector meter will be used for monitoring <u>Data Type:</u> Measured & signed Jointly by State utility officials & PPs representative. <u>Frequency:</u> Hourly measured <u>Recording:</u> Monthly from Main meter at state utility substation <u>Archiving Policy:</u> Paper & Electronic <u>Responsibility:</u> Project Head would be responsible for regular calibration of the meter. <u>Calibration Frequency:</u> Annually, as per the schedule mentioned in PPA
QA/QC procedures to be applied:	Meter should have a maximum error of $\pm 0.2 / \pm 0.5\%$ and be calibrated periodically according to be local state standard. Data can be double checked by receipts for sale to grid
Any comment:	Data will be archived during the whole crediting period + 2 years

The detail monitoring is mentioned in registered VCS PD under section 3.3 and 3.4

The ex-ante baseline emission factor is calculated using UNFCCC “Tool to calculate the emission factor for an electricity system” version 01.1 by using published data from official source of Central Electricity Authority (CEA), Government of India and is mentioned as below -

Regional Grid	Baseline emission factor (EF_{grid, CM, y})
NEWNE Regional Grid	0.906 tCO ₂ /MWh
Southern Regional Grid	0.927 tCO ₂ /MWh
