

VCS Validation Statement

Bureau Veritas Certification has made the validation of CGN Inner Mongolia Huitengliang Phase I Wind Farm Project owned by CGN Wind Power Co., Ltd. The project activity was registered as a CDM project on 17/06/2010 with the UNFCCC reference number as 3303.

<http://cdm.unfccc.int/Projects/DB/BVQI1264060132.69/view>

The Project began generating electricity on 15/09/2009. Due to some delays it was not registered under the CDM until 17/06/2010.

According to VCS 2007.1 dated 18/11/2008 and a Policy Announcement of Further Guidance for Projects that are registered in two GHG Programs issued by the VCS Association on 19/03/2008, the project registered under CDM program is eligible to claim Voluntary Carbon Units (VCUs) generated prior to the CDM program from 15/09/2009 to 16/06/2010. In compliance with the Policy Announcement from the VCS Association, this validation statement is to cover a validation of clauses 1.12, 1.13, 1.14, 8.1 and 8.2 set out in the VCS Project Description template for project validation and as an addendum to the CDM validation report of the project for completion of VCS validation.

An analysis as provided by the applied VCS program approved methodology demonstrates that the project activity is not a likely baseline scenario. Emission reductions attributable to the project are hence additional to any that would occur in the absence of the project activity. Given that the project is implemented as designed, the project is likely to achieve the estimated amount of emission reductions as specified within the final PD version 1.0 dated 28/09/2010.

The review of the PD version 1.0 and the information that are considered necessary to guarantee BVC to determine the fulfillment of stated criteria. In our opinion, the project correctly applies and meets the relevant VCS requirements and the relevant host country criteria.

VALIDATION PROTOCOL OF CLAUSES 1.12, 1.13, 1.14, 8.1 AND 8.2 OF THE VCS 2007.1 PD

Clauses of VCS 2007 PD	Ref.	MoV	COMMENTS	Concl
1. Description of Project				
1.1. Project Title				
1.12. Demonstration to confirm that the project was not implemented to create GHG emissions primarily for the purpose of its subsequent removal or destruction.	1. CDM-PDD 2.CDM Validation report 3. CDM LoAs	DR	The Project is to generate electricity using wind power resources and to supply the 126,916MWh electricity to the North China Power Grid annually, displacing equivalent amount of electricity supplied by fossil fuel-fired power plants. Thus the implementation of the project is not implemented to create GHG emissions primarily for the purpose of its subsequent removal or destruction.	OK
1.13. Demonstration that the project has not created another form of environmental credit (for example renewable energy certificates)	1.CDM PDD 2.CDM Validation report 3.CDM LoAs	DR	The project activity was registered as CDM project on 17/06/2010 and the request for registration was submitted on 21/01/2010 (validation completion date). The crediting period for the pre-registration VCUs is from 15/09/2009 to 16/06/2010, whose start date is within two years prior to the completion of the project validation and complied with VCS 2007.1 rules. Therefore, there is no other form of environmental credits created during the project crediting period under VCS 2007.1.	OK
1.14. Project rejected under other GHG programs (if applicable)	UNFCCC website	DR	The only GHG program that of CGN Inner Mongolia Huitengliang Phase I Wind Farm Project ever applied is CDM program, and it was successfully registered on 17/06/2010.	OK

Clauses of VCS 2007 PD	Ref.	MoV	COMMENTS	Concl
8. Ownership				
8.1. Proof of Title	2. CDM Validation report 4. Proof of Title 5. VCS PD	DR	CGN Inner Mongolia Huitengliang Phase I Wind Farm Project is developed by CGN Wind Power Co., Ltd. The letter of Approval (No.3449) issued by National Development and Reform Commission of the People's Republic of China is provided to demonstrate the ownership of the Project to CGN Wind Power Co., Ltd.	OK
8.2. Projects that reduce GHG emissions from activities that participate in an emissions trading program (if applicable)	UNFCCC Website 5. VCS PD	DR	The Project is registered as a CDM project on 17/06/2010. The Certified Emission Reductions (CERs) will transfer to Endesa Generacion, S.A. Only GHG emission reductions achieved from the commissioning date of the project activity up to 16/06/2010 could be verified as VCUs under the VCS 2007.1 program.	OK
