

BUREAU VERITAS CERTIFICATION HOLDING SAS CERTIFICATION STATEMENT

Bureau Veritas Certification has performed the verification of Inner Mongolia Wuliji Wind Farm Project, Inner Mongolia Autonomous Region, China (UNFCCC CDM Registration No.2483 dated 15/03/2010). The certification is based on the currently valid VCS Program 2007.1 released by Voluntary Carbon Standard Association on 18/11/2008.

The management of CGN Wind Power Co., Ltd. is responsible for the preparation of the GHG emissions data and the reported GHG emission reductions of the Project on the basis set out within the monitoring procedures in the VCS-PD version 01 dated 28/09/2010. The development and maintenance of records and reporting procedures in accordance with that plan, including the calculation and determination of GHG emission reductions from the Project is the responsibility of the management of the project.

Bureau Veritas Certification verified the VCS Monitoring Report version 02 dated 19/11/2010 for the reporting period as indicated below. Bureau Veritas Certification confirms that the project is implemented as planned and described in the VCS-PD. Installed equipment being essential for generating emission reduction runs reliably and is calibrated appropriately. The monitoring system is in place and the Project is ready to generate GHG emission reductions (VCUs).

Bureau Veritas Certification can confirm that the GHG emission reduction is calculated without material misstatements. Our opinion relates to the Project's GHG emissions and the resulting GHG emission reductions reported are based on the valid project baseline, monitoring plan and associated documents. Based on the information we have seen and evaluated we confirm the actual amount of VCUs associated with the project specific monitoring report that has been verified as following statement:

Reporting period:	13/09/2009 to 31/12/2009
Baseline emissions:	39,153 t CO ₂ equivalents
Project emissions:	0 t CO ₂ equivalents
Emission Reductions	39,153 t CO ₂ equivalents (VCUs)
